

**SDI Review Form 1.6**

Journal Name:	<a href="#">Journal of Advances in Biology &amp; Biotechnology</a>
Manuscript Number:	Ms_JABB_43608
Title of the Manuscript:	Harvesting of Chlorella variabilis Biomass by Moringa oleifera Seed-Induced Sedimentation.
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>Comments:</p> <ol style="list-style-type: none"> <li>1. Kindly ask the authors to edit some of the graphs for clarity of data.</li> <li>2. The compounds responsible for sedimentation in Moringa seeds have not been identified. This is important for precise science. Although the results indicate the method developed works for algae harvestation, identification of compounds or corroborative literature would add value to the findings.</li> </ol> <p>Request the authors to do the needful, post these changes, the manuscript can be accepted for publication.</p>	<ol style="list-style-type: none"> <li>1. We explained some of the figures better under their titles</li> <li>2. There are many reports on the possible active ingredients in moringa seed extract but there are likely many compounds involved. This has been included under the conclusion.</li> </ol>
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
