

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_43608
Title of the Manuscript:	Harvesting of <i>Chlorella variabilis</i> Biomass by <i>Moringa oleifera</i> Seed-Induced Sedimentation.
New title of the Manuscript:	Harvesting of <i>Chlorella variabilis</i> Biomass Using <i>Moringa oleifera</i> Seed-Induced Sedimentation.
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>No.1. Please see that (g/l still in figures and no clarity in Figure No. 3)</p> <p>No.2. Again the abstract and conclusions needs revision.</p> <p>No.3. Some good quality photographs during the study should be added (Compulsory)</p> <p>No.4. Represent the obtained results in tabular form (with mean and standard deviation).</p> <p>No.5. Please place all the references in proper format.</p>	<p>1. All the "g/L" have been changed to "g/l". The Figure 3, which is Figure 5 in the revised manuscript has been explained better.</p> <p>2. We have revised both the abstract and the conclusion.</p> <p>3. We have added some photographs (See Figure 1 and Figure 4)</p> <p>4. We have added error bars (mean with SD) in Figures 5 and 7. It is not conventional to present the same data as figure and table. Thus, we prefer to have them as figures. However, we have included the table as a separate file just to show you.</p> <p>5. We have checked the references and made the corrections.</p>
