PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. Title is misleading: remove the term "genetic variants" and specify the "whey proteins" studied 2. Line 29 needs a reference. 3. Line 47-58: remove all references in this section 4. Line 80: What exactly is Table1? Observed frequencies or expected frequencies? Furnish the two sets of frequencies (observed and expected) in Table 1 5. Table1: what was measured 1st: genotypic frequency or allelic frequency? Revise table to 4 decimal places 6. Line 89: Table2: present the standard deviations not standard errors 7. Line 198: provide English reference or alternate reference 	<ol style="list-style-type: none"> 1. The title has been corrected accordingly 3. The references cited in the Materials and Method section is essential, it was necessary to cite the authorities for the procedures used.
