

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#"><u>Journal of Advances in Biology &amp; Biotechnology</u></a>
Manuscript Number:	<b>Ms JABB 34580</b>
Title of the Manuscript:	<b>Preliminary Analysis on the Genetic Variants of Some Whey Proteins and Their Relationship with Milkfat in West African Dwarf Goat</b>
New Title of the Manuscript:	<b>Genetic Polymorphism of <math>\alpha</math>-Lactalbumin and Lactoferrin and Their Relationship with Milkfat in West African Dwarf Goat</b>
Type of Article:	<b>Original Research Article</b>

**PART 2:**

<b>FINAL EVALUATOR'S comments on revised paper (if any)</b>	<b>Authors' response to final evaluator's comments</b>
Again, I understand that this work is a preliminary investigation that was carried out with the objective to analyze the genetic variants of some whey proteins and their relationship with milk fat in West African dwarf goat. One of the primary experiments that were carried to obtain relevant results was the use of the cellulose acetate electrophoresis. The authors did not really revise their manuscript and the results of the electrophoresis were not shown. These figures of electrophoresis needs to be included.	<b>The pictures of the electrophoretic separation of each of the variants have been included in the manuscript.</b>
