PART 1: Review Comments

	Reviewer's comment	Author's comment
<u>Compulsory</u> REVISION comments	This manuscript can be considered for publication with major corrections	The queries have been corrected and highlighted in the manuscript as such
<u>Minor</u> REVISION comments	Please consider comments appeared in the text and instructions to authors must be followed. <i>Meloidogyne</i> spp. should be identified in this experiment to species level	The experiment was conducted under natural field conditions. <i>Meloidogyne</i> spp. encountered was obviously in mixed population and was religiously maintained at the genus level. All the tropical spp. could have been found under such a condition.
<u>Optional/General</u> comments	This manuscript deals with the most important nematode infecting okra
