SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Specific hypotheses to be tested are alluded to in the Introduction, but then never followed up with the actual tests. The Materials and Methods section is entirely devoid of description of the statistical analyses that were undertaken. A substantial amount of data is presented in the manuscript. However, attempts to interpret it appear subjective and not supported by hypothesis tests. It is implied that fertilization can offset weather conditions – however, no evidence is provided for this conclusion. Rather the evidence provided, by reference, is that fertilization increases yields.	Authors are grateful to reviewer for serious and scientific comment our manuscript. We accepted majority suggestion s according our possibilities. Calculation of correlations between meteorological data (precipitation and temperatures) was made. Based on mentioned improvement of manuscript, authors have kindly request for possibility change of categorization of our article from review to original research article if is possible, but in case that it is impossible that authors are satisfied with existing categorization. In case of need we are ready to improve manuscript according instructions.
<u>Minor</u> REVISION comments	The English grammar and syntax is substandard. It is highly recommended that the paper be edited by someone whose first language is English.	Language lecture was made by person which English is maternal language.
<u>Optional/General</u> comments
