PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Authors aimed to investigate the status of sesame webworm at western Tigray. The result gives some useful basic information and seasonality and distribution of this pest. As it is major pest of sesame this could be good study for the further studies in this pest. The manuscript may be accepted after revision 1. In this manuscript in many places the scientific names were written without giving proper spacing between genus and species; its need to be corrected 2. When first writing the scientific names it should write with author name who describe as per binomial nomenclature. This need to be corrected 3. Apart from this in many places space insertion is required in-between the words this need to be thoroughly checked. Some of the important missing reference is added in the manuscript and it need to be included in the revised manuscript. Overall the manuscript is good.	
<u>Optional/General</u> comments
