

Editor's Comment:

I would have loved the addition of standard deviation to some table as mention in the Ms.

Author's Feedback:

The mean values were used for the analysis of variance (ANOVA) and presented in tables. I do not think Standard deviation is appropriate for this study.

The consumption of snail is forbidden or discouraged by some tribes because they have some superstitious beliefs about snails. Some of the superstitious beliefs include

1. When a pregnant woman eats snail meat, a viscid substance comes out of the child's mouth not making the child to walk on time.
2. When someone eats snail meat, the person will become a dull person.
