

SDI Review Form 1.6

Journal Name:	Journal of Agriculture and Ecology Research International
Manuscript Number:	Ms_JAERI_31630
Title of the Manuscript:	Techniques of Sampling Organic Manure for Nutrient Analysis in Crop Production
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The abstract should highlight the techniques for sampling different classes of organic manure and the final conclusions. The introduction should be re written to present some of the draw backs that may arise by not analysing representative samples. Citing relevant and recent references. This will bring out the gaps that the techniques being introduced will fill The body of the paper contain too many write ups that are not really relevant to the title of the paper. For example, nutrient losses in manure after application. The sampling techniques for the different classes of the manure should be given specific names. E.g. Catch pan method for liquid manure The conclusion should be simple, straight forward and not speculative	
Minor REVISION comments	Minor editorial comments/suggestions are indicated in track changes	
Optional/General comments	The paper should be more focus on the title. The techniques of sampling and sample preparation should be described in more details.
