

**Editor's Comments:**

Although the authors have addressed some of the comments there are still few ones left; find attached with yellow highlights. **Stop using the old copy with the grammatical error and used this copy which I attach for further corrections.** I have corrected all the grammatical error in this copy. **The remaining issue to address in the manuscript is to "mention the kit used and the catalog number". It is simple to address if they really carry out the research. Lastly, they should check the references with Google scholar.**

**Author's Feedback:**

**Thank you very much for your help. I have revised the manuscript again according to your guide. Send it to you and check it again.**
