

SDI Review Form 1.6

Journal Name:	Journal of Advances in Microbiology
Manuscript Number:	Ms_JAMB_39522
Title of the Manuscript:	Analysis of Fecal Coliform Levels at Watering Points along the Upper Reaches of River Isiukhu in Kakamega County, Kenya
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>The manuscript entitled "Analysis of Fecal Coliform Levels at Watering Points along the Upper Reaches of River Isiukhu in Kakamega County, Kenya" conducted a study to determine faecal coliform levels in water samples in the River Isiukhu in Kakamega County, Kenya. The results obtained from the experimental design showed significant contamination of River and spring water at different sites. The levels of fecal coliforms were higher than the accepted levels by WHO. The higher faecal coliform levels were found during wet than dry seasons, indicating that water of River Isiukhu is not fit for drinking before treatment especially during wet seasons based on the WHO drinking water standard and the water quality.</p> <p>This is an important study for the people lives in the area of River Isiukhu. It could help to understand the contamination levels of the river water.</p> <p>The writing of this paper is good except some English errors, e.g., Faecal, it should be Fecal.</p> <p>I would recommend accepting this paper. However, before accepting this paper, I would ask the authors to check the spelling and English errors throughout the manuscript text, if any.</p>	These have been fixed
