

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Microbiology
Manuscript Number:	Ms_JAMB_42685
Title of the Manuscript:	Levels of Biofilm Expression in Klebsiella pneumoniae strains exposed to Herbal Drugs
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>>Unfortunately these herbal drugs are only peculiar to Nigeria. They are branded by >the companies that make them. Hence researchers do not know their contents >entirely.</p> <p>Even if the logic of a company is involved, it is impossible to agree to publish scientific papers relating to medicines whose contents cannot be clarified. Academic papers should be independent of the logic of the company. The authors should rebuild their research plan.</p>	<p>Thank you for your well thought out suggestions. I appreciate them. Originally phytochemical and heavy metals analyses were part of the work but due to lack of facilities, finance and also a company to perform these analyses, they were left out. I definitely agree that the contents of these drugs need to be evaluated and quantified.</p>
