

Editor's Comment:

I would like to express my gratitude for your efforts in the rise of **Journal of Advances in Mathematics & Computer Science**. After reading the original paper, and peer reviewers' comments on the original paper. Then viewing revised paper version and authors' response. For that, I recommend to accept it for publication in our journal after minor revision:

One of the reviewers suggests that:

The References is very poor and missing. The author must check all references and correct all punctuation errors, Journal names and authors names.

I think The author must add following references which are about fuzzy. For example:

1. Ö. Talo, E. Dündar, I-Limit Superior and I-Limit Inferior for Sequences of Fuzzy Numbers, Konuralp Journal of Mathematics, 4(2) (2016), 1643-172.
2. Ö. Talo, Some properties of limit inferior and limit superior for sequences of fuzzy real numbers, Information Sciences, 279(2014), 560-568.
3. E. Dündar, Ö. Talo, I2-convergence of double sequences of fuzzy numbers, Iranian Journal of Fuzzy Systems Vol. 10, No. 3, (2013) pp. 37-50.

I see the References form need to more revision and to add the suggested references.
