

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	Ms_BJMCS_34591
Title of the Manuscript:	Modeling and Simulation of the Population Dynamics of Snails Biomphalaria tenagophila, in Tres Palmeras, Salta, Argentina
Type of the Article	Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1) The authors should give more details in "2.3 Mathematical modeling". For example, in your simulations, which function of f you adopt? In page 3, you said, $f=r-sSc$, what's the relation between the function P in (2.2) with f? 2) I don't think the label of the axis in Fig.1 top is right. For example, 2005, 2005.5..... And there is no label of the vertical axis.	1) Two numerical examples are given to explain the relation between the function P in (2.2) with f. 2) Labels and scales were changed as suggested.
Minor REVISION comments	1) Add a reference about method of Ford-Walford in page 3. 2) Correct the format of the last Section, Conclusion. 3) Check the captions of all Figures.	1) Two references were added regaded the Ford-Walford method. 2) Format was adjusted as requested. 3) All captions were checked and improved as requested.
Optional/General comments
