| <b><u>Compulsory</u></b> REVISION comments | <p>1. Simulation results should be clearly illustrated.</p> <p>2. The <b>Abstract</b> is poorly written. The author(s) should polish its language. "The study seeks to identify, by means of analytical, qualitative and numerical simulations, the causal factors and parameters, particularly population related ones, which ignite qualitative changes in the performance of real per capita income over time. " should be deleted.</p> | <p>1. Simulation graphs were provided in the manuscript submitted, except that they were in the appendix. I have now pasted them close to the relevant portions.</p> <p>2. I have re-done this part to read: "<i>The study seeks to identify, by means of analytical and qualitative methods, as well as and numerical simulations, the causal factors and parameters, particularly population related ones, which induce qualitative changes in the performance of real per capita income over time.</i>" Anyway, I have no reservation if you still believe what you slated for deletion should go out.</p> |
