

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_38517
Title of the Manuscript:	An efficient CRT Based Reverse Converter for $\{2^{2n+1}-1, 2^n-1, 2^{2n}-1\}$ Moduli Set
Type of the Article	Method Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This paper presents a reverse converter for the moduli set $\{2^{2n+1}-1, 2^n-1, 2^{2n}-1\}$ using a Chinese Remainder Theorem (CRT) algorithm and reverse method of data conversion. This really novel and having sound mathematical work.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The paper is really novel and having strong mathematical work. I strongly recommend for its acceptance.	I thank the Reviewer for sparing his valuable time to go through my manuscript. Thanks once again for the recommendation.
