Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_37973
Title of the Manuscript:	VARIANTS OF COMPATIBLE MAPPINGS IN MENER SPACES
Type of Article:	Original research paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The title is concise and expressive, the abstract gives good idea about the whole article, and the article as a whole is an excellent work and contains an original and minor contribution In recent times, there have been given so important papers in pure mathematics theory. In my opinion, some references about the theory are missing. The following issues must be addressed and cited in the part of introduction before the paper is considered for publication. 1. Ansari, A.
