SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Hough transform is used for iris segmentation but wasn't described in the paper; A brief theory wasn't defined and how eigen vectors were used to reduce space dimensionality; In page 3; author must explain how threshold is used using the minimum Euclidean distance since SOM used unsupervised training; Classification with and without PCA wasn't conducted; Please clarify the Plagiarism: In page 3, Image acquisition paragraph is extracted from the following link: https://www.ijsr.net/archive/v3i4/MDIwMTMxNTg3.pdf	Hough Transform Segmentation theory & formulae now included Brief theory & usage of Eigen vectors now included in section 3.4. Also included is how threshold was used as a guide for the facts/information being sought after. We used CUiris, CASIA & CUHK iris images obtained from their respective sources & not this link. No plagiarism.
Minor REVISION comments		
Optional/General comments
