SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		Thank you for taking your time to go through the work and for making good observations.
Minor REVISION comments	There are many typo mistakes throughout the document, kindly read carefully and correct it. Some are mentioned here Page 1 second line in the section of introduction “and other aspect” should replace by “and in other aspects” Page 2, first line, almost Hermitian manifolds Maria falcitelli, stere Ianus, and Anna Maria Pastore (2004). Should replace as almost Hermitian manifolds by Maria falcitelli, stere Ianus, and Anna Maria Pastore (2004). In page 2, second paragraph, second line, correct format. Page 2, second paragraph, third line, study should replace by studied Page 2, second paragraph, line 5, sentence is starting from “almost” first letter must be capital. Page 2, Section 2, at the end of first line, there should be space between “.” And “As” Page 3, second paragraph, second line, after first word J-frame, there are both full stop and comma, comma should remove. Page 3, in paragraph after equation 2.3, last line start with “see”, it should be “See”. Page 5, first line start with “and”, please check first letter should small or capital. Before references, last line is “and the result is obtain.” Kindly correct it. There should not comma before reference number 4. There should not full stop before last and third last reference. In fourth reference from last, please check “ Pastore.Riemannian” and correct it.	I have now read carefully again and corrected all the noticable corrections. Thank you.
Optional/General comments	Due to wide range of applications in mathematics and physics, Riemannian Submersions are of great importance. Maria falcitelli, stere Ianus, and Anna Maria Pastore studied Riemannian submersions and related topics. Ianus S, Ionescu AM, Mazzocco R, Vilcu presented results of contact-complex Riemannian submersions, i.e. Riemannian submersions from an almost contact metric manifold onto an almost Hermitian manifold. In present paper complex-contact Riemannian submersion, i.e. Riemannian submersion from an almost Hermitian manifold to an almost contact metric manifold are studied and properties of such maps are discussed. Subject is technically sound. Computations are correct. However needs to correct typing mistakes. After corrections I am agree to publish the article.
