

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_40993
Title of the Manuscript:	On the geometry of Complex-Contact Riemannian Submersion
Type of the Article	Original research papers

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The author(s) gave structure equations of a complex-contact Riemannian submersion and studied the fibers of this submersion is a contact metric submanifold of the total space. Also, they surveyed the distributions and gave a necessary and sufficient conditions for such submersion to be a totally geodesic map. So, I recommend the manuscript to be suitable for publication in " Journal of Advances in Mathematics and Computer Science ".	Thank you
Minor REVISION comments	The authors have made a mistake in the spelling of some words in the manuscript, so they can fix them and to insert a "Conclusions" section, in which, again to emphasize (using appropriate citations) which is the merit of the results in view of actual valuable literature.	Thank you for that observation. I have now checked all the spelling mistakes and corrected them. I have also created a conclusion section as suggested.
Optional/General comments
