

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_40993
Title of the Manuscript:	On the geometry of Complex-Contact Riemannian Submersion
Type of Article:	Original research papers

PART 2:

FINAL EVALUATOR’S comments on revised paper (if any)	Authors’ response to final evaluator’s comments
I asked for a major revision, which was necessary.... In particular: ☐ it is still not clear from the introduction what the contribution of this paper is compared to previous work; ☐ the abstract and the introduction are still full of language mistakes, as if they were not read before submitting; ☐ there were some new mistakes introduced (e.g.: they now refer to the 11th item in the reference list as “Maria et al (2004)”, where Maria is the first name of the first author); ☐ even mistakes that I pointed out explicitly in my previous report (such as the reference to Gray on the first page or the recurring misspelling of “Riemannian” as “Riemnnian”) were not corrected at all. .	Thank you so much for all your observations. We proved that the fiber of the submersion is a contact metric submanifold, though mentioned in previous work, but the proof was not provided. We obtain some conditions for the geodesicity of the distributions and the map. We have written the full names of the first author. “Maria Falcitelli et al ” as you have rightly pointed out. We have also corrected the name “Riemnnian” to “Riemannian” as rightly observed.
