

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_42164
Title of the Manuscript:	Numerical Study of Viscous Dissipation and Temperature Dependent Viscosity on MHD Free Convection Flow Over a Sphere with Heat Conduction
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1- The order of the references according to the appearance, but references [8] and [9] came in the end of introduction, not in the proper order.	In introduction we include references [8] and [9].
Minor REVISION comments	1- I think author must write the basic equation which describe the motion of the fluid. 2- The author dose not mention the program which used for solving the final equations.	1. Here we do not include the basic equations because our article may be too large. 2. Final equations are well defined.
Optional/General comments	1- I think these references are old, But we are knowing that there are many modern references in this subject	We include new two references.
