

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_39362
Title of the Manuscript:	Generalized Frequency Re-use Ratio for Uniform and Non-uniform Cell Range in Telecommunication Network Design
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The authors present an excellent survey paper. The main goal of this survey is to present an analysis of generalized frequency re-use ratio for uniform and non-uniform cell range in telecommunication network design. I would like to suggestions to the authors the following points: - To provide as better resolution of the figures 3(b) and 7; - The research part (named related works) is not very solid, that is, this section must discuss the features of recent works, is extremely required. Except that there are, few related works or papers can be found for comparisons.	
Optional/General comments
