

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_40993
Title of the Manuscript:	On the geometry of Complex-Contact Riemannian Submersion
Type of the Article	Original research papers

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Some results in the paper under review are not original and can be found in the book [M. Falcitelli, A.M. Pastore, S. Ianus, Riemannian submersions and related topics, World Scientific, 2004] on page 117. The paper under review deals with Riemannian submersions whose total space is an almost Hermitian manifold and the base space is an almost contact metric manifold, focusing on the geometry of the fibers. The results are rather simple and the techniques that are used no new. Moreover, some results in the present work are not original, as the author/authors claims/claim. For example, Theorem 3.2 and Theorem 3.3 can be found in the book [M. Falcitelli, A.M. Pastore, S. Ianus, Riemannian submersions and related topics, World Scientific, 2004] as simple remarks (see page 117). On the other hand, the paper in the present form looks like a first draft, containing a lot of grammatical mistakes, typographical errors and ambiguities.	
Optional/General comments
