

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_42263
Title of the Manuscript:	A Computational Model for Multi-Level Quadratically Constrained Quadratic Optimization under Fully Fuzzy Environment
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Author should give the flow chart of the proposed approach in the manuscript to easily understand the algorithm. At present it looks like a black hole. 2. Update the introduction section with some of the recent articles under the fuzzy environment for solving different types of the problems. 3. This article also has fewer references.	
Minor REVISION comments	1. The research paper should be written in perspective of third person. Words such as 'I' 'we' 'our' etc. needs to be avoided. 2. On page 9 and 10, at step 1,4,6,7,13,,16,19,21,22,23 the word " go to step " should be deleted.	
Optional/General comments	The content of the article is basically complete and the hierarchy is arranged well. The essay is basically in line, the argument is more prominent, the argument can serve the argument better. In general, the format meets the requirements of the specification; Reference to certain literature data, its timeliness general; There was no apparent plagiarism.
