

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_42590
Title of the Manuscript:	Complete Dynamics of a Fundamental Bound State Theory and Application to Gravitational Systems
New title of the Manuscript:	Acceleration in a Fundamental Bound State Theory and the Fate of Gravitational Systems
Type of Article:	Original Research article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The Authors have addressed the questions posed about their exposition. As the paper is about matter Physics (and related thematics) rather than about General Relativity, their response can be considered satisfactorily for the content of the paper. Possibly, the manuscript could be considered for a special issue more dedicated to these thematics, rather than the usual other papers of the Journals, as the manuscript is very original and very peculiar.
