

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_45273
Title of the Manuscript:	On the Solution of Linear Differential Equations with Polynomial Coefficients near the Origin and Infinity
Type of the Article	Original-research-article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	N/A	
Minor REVISION comments	The last line below Lemma 3.6 needs to be checked. The full stops at the end of (73)(78) should be deleted. The commas in (74 to 77) should be checked. See Lemma 3.11 Also check the commas and full stops from (88) onwards In the Conclusion, 'coefficiens' should be 'coefficients'. Other spellings are to be looked at in the text.	We checked Lemma 3.6, and we found errors in Ref. [5],. We corrected Eqs. (64), (66), and the following equations involving related errors, and wrote Remark 3.7 about the errors in Ref. [5]. We could not see what to do about full stops and cammas, and we did not do anything. We wrote "t" following your suggestion, but found no other spelling erroes.
Optional/General comments	The Authors showed that the solutions near infinity are easily obtained and the asymptotic behaviors were discussed with the aid of a theorem given.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
