PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript is interesting, but there are too many errors to be published in a journal. Fortunately, most errors are just related to proper exposure of scientific English, and have to do with grammar and elegance of exposure, so they can be easily fixed. Since they are just too numerous to be listed, I attached the copy of the manuscript, with the specific areas that I think should be corrected. Other errors include more serious things, like wrong references and unclear tables. Again, I indicated all the area that need an explanation in red, in my attached pdf revised version of the manuscript.	Thank you. All the grey areas has been addressed and corrected as much as possible. The distributions of the types of leukemia have been indicated as requested. The corrected areas are highlighted in yellow.
Minor REVISION comments		
Optional/General comments
