

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_40379
Title of the Manuscript:	DISSEMINATED INTRAVASCULAR COAGULOPATHY; A CONDITION TO MONITOR IN THE MANAGEMENT OF LEUKAEMIA PATIENTS
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The revised paper is good and it can be published. The only thing I suggest (very minor revision) is to eliminate the second decimals from the results section in the abstract (sentence indicated below): for example, it's better in my opinion to write "67.6" seconds instead of 67.59 seconds, or "194 platelets" instead of 193.62 platelets . Although mathematically correct, a clinician does not need the precision a tenth of a second or fractions of platelets in the results.</p> <p>Result: The mean \pm SD values of the parameters assessed in the leukaemia patients include $3.74 \pm 3.13 \mu\text{g FEU/mL}$, $67.59 \pm 55.71 \text{seconds}$, 1.84 ± 0.09, $77.34 \pm 31.81 \text{seconds}$, $193.62 \pm 102.79 \text{cells/mm}^3$, $74 \pm 124.42 \text{ cells/mm}^3$, $30.07 \pm 5.38\%$ for D-dimer, PT, INR, aPTT, platelets, WBC and PCV respectively.</p>
