

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_44936
Title of the Manuscript:	Assessment of clinical outcomes of outpatients following chest X-ray imaging performed at King Abdul-Aziz Medical City, Saudi Arabia, Riyadh
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>1. 1. stratified randomly sampling technique – include the flow chart for selection of samples in methodology.</p> <p>estimated to be 3,096 x ray per month, since the data was collected more than 6 months , how you chosen the 185 samples including 16-90 years?</p> <p>2. In Keywords: Electromagnetic Waves</p> <p>Not given details any where in abstract, what is the need to mention?</p> <p>3. In introduction,starting with one study, in 41 and 46 line can be modified with author or place name?</p> <p>4. In introduction, after 14 reference mentioned 26 reference number , in between of 15 to 20 reference number are missing.</p> <p>5. In 76 line , Appropriate statistical tests were used based on the types of variables and the data.- no need to mention, because used only number and percentage alone.</p> <p>6. Regarding 110 line , variables mentioning same information in the para and as well in table , can shortlist with para?</p> <p>7. Regarding table 3 and 125 line the positive and negatives percentage mentioned were controversy and including discussion 171 line.(mentioned in the manuscript with red colour.)</p> <p>8. Can modify the sentence, the majority of the radiological findings were related to lung disease, whereas bone disease was rare, with pleural effusion as the most prevalent condition.</p>	<p>The data was collected from PACS. The national guard hospital is divided into two units: one for paediatric which is known as king Abdulaziz children hospital and other known as King Abdulaziz Medical city which is mainly specialized for only adult patient. Hence the data was collected randomly from the King Abdulaziz Medical city based on the availability of medical record as in the PACS.</p> <p>The keyword 'Electromagnetic Waves' is being replaced by a word 'Imaging modalities'.</p> <p>As it was collected from the web resources , I preferred to remain as it is</p> <p>References were inserted in relevant to the contexts</p> <p>We omitted that sentence</p> <p>We omitted few of the similarity information as in the para and table 1</p>

SDI FINAL EVALUATION FORM 1.1

<p>Instead of this, the majority of the radiological findings were related to lung disease especially pleural effusion as the most prevalent condition whereas bone disease was rare. So that the viewers can catch the point the easy and clearly</p> <p>9. In overall, to superscript the reference Number continuously without interruptions</p>	<p>It was a typo error from our side. We modified accordingly as it is highlighted with red colour. The number of samples with respect to negative and positive radiological findings was corrected as it is highlighted with red colour</p> <p>Yes we inserted instead of previous one</p> <p>Reference number was inserted accordingly</p>
