SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	- The manuscript should be subjected to thorough language editing. - - Please reform Table 1 (eg. Total number of patients in the first column is 43 and not 70). In addition the description of the table 1 in the text should be changed (Kappa in line 126 is not 0.67) - - Please reform table 2 (eg please replace Observador with Observer) -	A language revision was done. The typo was corrected. Done.
<u>Minor</u> REVISION comments	It would be interesting to add a table with more detailed findings of VIT, indicating the interobserver agreement for findings of CIN2 and CIN3 . This would show more strongly the contribution VIT to cervical cancer screening (since there is low IOA between pathologists regarding cytopathologic findings of CIN2 and CIN3 in Pap smear)	We added the table - 3 (line198).
<u>Optional/General</u> comments
