

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_22249
Title of the Manuscript:	A 'single point' experimental approach of assessing the inactivation kinetics of β glucuronidase by aqueous-based leaf extractives notably used as enemas.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	1-It is better to change the word microflora by microbiota. 2-Describe and discuss if patients with diarrhea or bowel cancer present more Ruminococcus gnavus and Escherichia coli. 3 Discuss if the extracts could change microbiota composition. 4- Could be these extracts administered orally(in food or drink)?	This change has been effected This study was not on this subjected matter so I could not have discussed it but is on consideration in the subsequent study The study looked at the inactivation of beta-glucuronidase which could be secreted by microbiota and not on the antimicrobial effects
<u>Optional/General</u> comments
