

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_22301
Title of the Manuscript:	Antiproliferative activity by ethanolic extract of Alpinia galanga Willd in inoculated breast carcinoma cells of C3H mice
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript titled “Antiproliferative activity by ethanolic extract of Alpinia galanga Willd in inoculated breast carcinoma cells of C3H mice” reports data on the effect of ethanolic extract of Alpinia galanga Willd as inhibithor of breast carcinoma proliferative activity leading to decrease of tumor volume. Some criticism regards the protocols used described as “were approved by the Ethical Committee of Faculty of Medicine, Andalas University”: details should be given remembering the ethical regulation existing on the use of animals for laboratory studies. Conclusion section must be expanded and better assessed to the scope of the manuscript indicating also perspectives. Bibliographic references are limited and not updated. English form/grammar/spelling needs a complete revision to be done my a mother tongue expert. Text is unclear here and there: so a complete text revision is necessary to improve readability. Ethical issue: yes Details should be given remembering the ethical regulation existing on the use of animals for	The Committe of the Research Ethics of the Faculty of Medicine, Andalas University, with regards of the protection of human right and welfare in medical/health research, has carefully review the research protocol and recommended the research protocol. The recommendation is given after the researchers presented this research in front of the Committee. The research protocols already added into the manuscript The conclusion was revised.
