

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_22301
Title of the Manuscript:	Antiproliferative activity by ethanolic extract of Alpinia galanga Willd in inoculated breast carcinoma cells of C3H mice
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The Conclusion section (end of the manuscript) is still very poor. The References are limited and must be expanded to address the Discussion and Conclusion sections. English still needs to be revised as well phrasing/grammar. There are spelling errors here and there which make the readability limited. The Ethical recommendations and number reference for authorization by Ethical Committee must be added to the text.	Dear Reviewer, According to your comments I realise that the analysis still to short, so I add several articles as my references, and ethical clearance number. I also add antiproliferative activity evaluation by Ki-67 immunostaining.
