

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_23172
Title of the Manuscript:	Antibacterial activity of essential oil of central Malawi Corymbia citriodora leaves against Escherichia coli and Staphylococcus aureus
Type of the Article	Original research Articles

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. Please note how many isolate of bacteria used in this study for investigation of antibacterial activity. 2. Please give more details/information in Discussion about the antimicrobial activity that effect on different species of microorganisms.	1. Done as recommended. 2. Done as recommended.
<u>Minor</u> REVISION comments	1. Please check the data showed in results. It should be show in Mean and SD because the data obtained from four replications. 2. Please check the format of writing of Scientific name.	1. Done as recommended. 2. Done as recommended.
<u>Optional/General</u> comments	If the authors would like to show in the smart data, it should be used another method to test anti bacterial activity simultaneously, such as broth dilution technique. Moreover, how many isolate of E. coli and S. aureus used in this study? If there are much more isolates used in this study, it lead to get the data sufficient for statistically analysis.	The authors appreciate for the suggestion and we are willing to use the technique in our future studies. Thanks for the track changes. All the changes has been incorporated in the manuscript.
