1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Excellent manuscript. Easy to read and of interest to my colleagues dealing with hypospadias surgery. The hypospadias in these boys were of different grades and the patient group thus very heterogenic. I suggest that the terms Q max and Q average should be defined in the tables and the terms used e g ml. should be spelled out in the table to make it easier to read.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
