

SDI FINAL EVALUATION FORM 1.1

PART 1:	
Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	2015_JAMPS_16569
Title of the Manuscript:	COMPARATIVE STUDIES ON THE EFFECTS OF ZIDOVUDINE, NEVIRAPINE, LAMIVUDINE AND BIOCLEAN II ON FEMALE HIV/AIDS CASES IN NIGERIA
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The author made some changes to the language which should be commended, but a stronger study design would have helped to support the claims made in the paper which could be misleading to HIV patients looking for non-traditional medicines. The manuscript would make a great case report for future exploratory studies and the author's efforts to continue studying this medicine with a more rigorous design would be appreciated.	We have only suggested that Bioclean II could be an intervention tool in the cycle of HIV/AIDS disease but not as an alternative to HAARs which remain the gold standard for HIV/AIDS management. Further studies have been advocated so that the real value of the product can be ascertained.
