SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The intake level seems to be extremely high for conducting supplementation study. Please make the rationale setting the intake amount. Please Clarify the ethical issue: There is no explain for ethical committee in the present manuscript.	In this research work, large dosage of the extract were adopted in order to mimic the human habitual dosage. It was captured in the revised paper. Thank you The ethical committee is after adherence to principles and regulation of handling experimental animal. Though we don't have a certified and registered ethical committee in the institution. All research involving the use of animals has to abide by the general rules and regulations regarding the use of experimental animals. In this research, We follow the recommendation of: • Principle of laboratory animal care (NIH Publication No. 8523) (NIH, 1996). • Ethical guidelines for investigation of experimental pain in conscious animals (Zimmermann, 1983). It will be captured in the revised manuscript. Thank you
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
