SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Title :restructure, it is not showing the actual picture of the study Abstract : not giving the aim properly, Introduction: the plant was described well but completely forgot to put a justification, why they are doing this research. Methods: were described on histopathological parameters but it is not enough to establish the work. Experimental design was well laid out with specific controls. Results: were good but needs more parameters to support the research. If you have any of the antioxidant parameters, add them together with results. Discussion: needs more explanation with recent publications. There should be additional supporting parameters to establish that the extracts are working through the antioxidant pathway. References: needs some more recent publications	Thank you for your comment; we have done all the necessary corrections.
<u>Minor</u> REVISION comments	Needs to add some more antioxidant parameters to support the results and discussion.	Thank you for your comment; we have done all the necessary corrections.
<u>Optional/General</u> comments	Needs to add some more supporting data to consider as a full length paper.
