

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_24239
Title of the Manuscript:	ASSESSMENT OF THE RETICULAR FIBRES ON CADMIUM INDUCED LIVER DAMAGE FOLLOWING ORAL ADMINISTRATION OF MORINGA OLEIFERA OIL AND ANACARDIUM OCCIDENTALE OIL IN WISTAR RATS.
Type of Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Although some changes have been done, the core changes were not corrected especially all micrographs; (Although, the study was designed on a toxicological standard with a histological analysis, it lacks the very basic histological results as authors utilized one single staining technique (Silver) and got unclear, bad-focused, thick-sectioned and vague-stained sections with non-acceptable photomicrographs).	We sincerely appreciate your criticism toward achieving a standard and acceptable articles, nevertheless, reticular fibers outlines of liver tissues was our main focus of the study, and the tissues were sections at 5µm as described by the staining techniques adopted, but the resolution of the camera used for image capture was actually bad and necessary adjustment has been made. Thanks.
