

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_24780
Title of the Manuscript:	Effect of Magnesium Sulphate on Hepatic Biomarkers in Pre-eclamptic Patients in Selected Tertiary Hospitals in Osun State South Western Nigeria
Type of Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I consider that most of the recommendations were favourably attended by the authors; although, the ethical issue; related to the control group of preeclamptic women, remains unanswered. It is important to explain whether the control group was formed by women without complications; or adverse conditions associated with preeclampsia, or if they were followed up to monitor the evolution of the disease. It is important explain why they did not receive an alternative treatment.	Thanks for this observation. The preeclamptic women not on MgSO ₄ were actually patients who reported to the hospital facility for treatment. We however obtained the necessary samples from them before they were placed on necessary treatment.
