PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
It is important that authors describe in the text, specifically in section number 2.2.4; the answer to the final comments, related with the ethical issue. I recommend change the phrase "The subjects used for this project" (2.2.4 Method of selection of subjects"), and use the following "The subjects who participated in this project"	We have added point 'vi' in section number 2.1.4 (Method of selection of subject). This in addition to points i, ii, iv and statement in section 2.1.1 (lines 75-77), should suffice, we believe, to the answer to our last comment relating to the ethical issue. Thank you. Thank you for pointing out this and also giving the appropriate phrase to use. The correction has been effected and is highlighted as expected.
