PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Thank you very much for the authors' effort to revised the manuscript. I have proposed some minor corrections on the revised manuscript, please check. Table 2: I don't really understand the p-values. P values are provided in each row basis, which consist of Group A and Group B. While in the table note mentioned that comparison of pain score before and after treatment. Please describe better. Discussions: The description of Group A is Study group and Group B is control group had been described elsewhere, the authors do not need to describe every time. Please revise.	Thank you for the comments and the proposal for the minor corrections in this manuscript. Attempt has been made by the authors to improve the manuscript. Better explanation has been provided at the foot note of table 2. (There was a statistically significant difference ($p < 0.001$) in the mean post-operative pain score for the study groups) Changes have been made
