

Editor's Comments:

The submitted manuscript reports an interesting study but it needs revision. Material and methods section should more precise. Presently more data about methodology is visible in result section. Ethical permission is not mentioned. The current version is lack of any discussion. Moreover, the study limitations should be presented. The list of reference should be uniformed (check citation data, e.g., journal acronyms).

Author's Feedback:

Thank you for the editors' comments concerning our manuscript entitled "Effect of Drug-Drug Interactions by Association Rule Discovery among the Elderly". Those comments are all valuable and very helpful for revising and improving our paper, as well as the important guiding significance to our researches. Revised portions are marked in yellow in the paper. The main corrections in the paper and the response to the comments are as follows:

Q1: Material and methods section should more precise.

Ans.: I have added the statement in the material and methods section, and revised portions are marked in yellow.

Q2: Presently more data about methodology is visible in result section.

Ans.: I have added more content about methods in the analysis section and revised portions are marked in yellow.

Q3: Ethical permission is not mentioned.

Ans.: In this paper, we use the data from the database of the Teaching Hospital. Ethical approval was obtained from the Ethics Committee of Hospital prior to the commencement of the Study.

Q4: The current version is lack of any discussion.

Ans.: I have added the discussion in the paper and revised portions are marked in yellow.

Q5: Moreover, the study limitations should be presented.

Ans.: The source of data is mainly limitations in the paper. The data from the Teaching Hospital.

Q6: The list of reference should be uniformed (check citation data, e.g., journal acronyms).

Ans.: I have revised the format of reference.
