SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Ethical issues: It was not stated if patient's or parents' consent was sought.	Please see attached file.
Minor REVISION comments	ABSTRACT Grammatical errors noted eg 12year old instead of 12 years old. APS should be written in full at first interval. INTRODUCTION Lines 12 and 13 should be written. SLE should be written in full initially before abbreviation. Line 20- substitute do not for donot. CASE HISTORY- Please recast line 29-32. DISCUSSION Line 56-Change in patient's based to is patient's based. Line 60-Change would have been big help to would have been a big help. REFERENCES- Line 76-Authors name in reference 8 should not be in upper case letters. COMMENTS- References in the text are not consistent. No conclusion in this manuscript Authors should recheck their references. Otherwise it is a good attempt. But the question is how come the patient degenerated to this level of incapacitation.	All these corrections are done. The patient left against medical advice in the middle of workup without informing medical staff. This led to delay in diagnosis and worsening of symptoms.
Optional/General comments
