

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

|                          |                                                                                                                                           |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">Journal of Advances in Medical and Pharmaceutical Sciences</a>                                                                |
| Manuscript Number:       | Ms_JAMPS_29419                                                                                                                            |
| Title of the Manuscript: | HEPATOPROTECTIVE AND ANTIOXIDANT ACTIVITY OF AMORPHOPHALLUS CAMPANULATUS TUBERS EXTRACT AGAINST PARACETAMOL -INDUCED LIVER DAMAGE IN RATS |
| New title:               | CAMPANULATUS TUBERS EXTRACT AGAINST PARACETAMOL -INDUCED LIVER DAMAGE IN RATS                                                             |
| Type of Article:         | Original research paper                                                                                                                   |

### PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Authors' response to final evaluator's comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Despite that the authors claimed to have effected a number of changes particularly on the grammatical expressions, technicality and design of the work, many issues of major concern are still evident.</p> <p>The followings are typical examples:</p> <ul style="list-style-type: none"> <li>-The plant name should be fully written at first mention</li> <li>-The abbreviations used should be defined at first mention</li> <li>-Why reporting results in the methodology section for the acute toxicity test? Also, the protocol used does not reflect OECD 423 guideline as claimed by the authors</li> <li>-GPx was evaluated but GSH was reported</li> <li>-The methods for the evaluation of the liver maker enzymes are outrightly missing</li> <li>-Results of the antioxidant enzymes are not inclusive in the abstract</li> <li>-What is statistical analysis doing in the abstract?</li> <li>-Line 51: collection of plant sample (what year?)</li> <li>-Soln., Govt. etc within the text are not acceptable</li> <li>-Proteins and carbohydrates were not tested for but reported in the results section. The Table showing the presence of the phtyochemicals is also not inclusive</li> </ul> <p><b>These and many more issues of concern are contained in the manuscript.</b></p> | <ul style="list-style-type: none"> <li>-The plant name is written fully with abbreviations at first mention.</li> <li>-In the methodology section result has been eliminated.</li> <li>-OECD 423 guideline has been followed, objectionable protocol has been removed.</li> <li>-GPx has been reported in the results.</li> <li>-The methods for the evaluation of the liver marker enzymes have been added.</li> <li>-Results of the antioxidant enzymes have been included in the abstract.</li> <li>-In the guideline for author (The abstract should be concise and informative. It should not exceed 300 words in length. It should briefly describe the purpose of the work, techniques and methods used <b>major findings with important data and conclusions.</b>) so the major findings with conclusions are written in the abstract.</li> <li>-In the year 2008 collection of plant sample was performed.</li> <li>- Short forms have been eliminated.</li> <li>-Table has been added to show the phytochemical analysis.</li> </ul> |
