SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The authors have shown that <i>Vernonia amygdalina</i> is beneficial owing to the ameliorative property on both the kidney as well as plasma glucose. The nephritic changes observed in diabetes mellitus have been attributed to the activity of free radicals; the treatment with <i>Vernonia amygdalina</i> could ameliorate the adverse effect by the restoration of oxidant-antioxidant balance. The following corrections that have to be made are indicated in the checked manuscript as yellow highlight and the changes to be made are given in the sticky notes. Page 6 Line 238 change to Catalase (as shown in sticky note) Page 7 Line 281 change to decrease (as shown in sticky note)	
Minor REVISION comments		
Optional/General comments
