SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The special thing about this case is the age of the patient. The focus should be on APS and CAPS in pediatric population. The Authors did not focus on this point enough and very little was mentioned about pediatric CAPS in the introduction and nothing was mentioned in the discussion. For example, the paper can discuss differences between the adult CAPS and pediatric CAPS, in regard clinical manifestations, diagnostic criteria, and treatment...etc. Another point, the discussion is very short and no clear message was mentioned. The discussion should stimulate a new idea, present a thoughtful observation, and reflect the importance of the presented case.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
