Manuscript Number:	Ms_JAMPS_26638
Title of the Manuscript:	Investigating tobacco hazard prevention in southern Taiwan
New Title:	A test purchasing plan for the sale of cigarettes in southern Taiwan
Type of Article:	Short Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The paper has improved however there are still some minor corrections to be done. I captured the areas needed for corrections and also stated my suggestions in red. <u>Title of paper</u> The title of the paper: A test purchasing plan for the sale of cigarettes in southern Taiwan is grossly inadequate and does not capture the scope of the research carried out... Suggestion: Replace the title with "A study of the distribution of illegal sales outlets of tobacco products to minors in Southern Taiwan" <u>In Abstract</u> The aim of the study is to estimate of the illegal sale of cigarettes to minors among retailers in southern Taiwan.... Replace the highlighted with "evaluate the distribution of illegal sales outlets of tobacco products in minors" Line 50.. estimate of the illegal sale of cigarettes to minors... Replace the highlighted with "evaluate the distribution of illegal sales outlets of tobacco products in minors" Descriptive statistics and statistical inference were used in this study. The significance level was set at p<0.05. All analyses were performed using SPSS software (version 18)... Put this under a separate header... "STATISTICAL ANALYSIS" 111-113 ... Based on literature review, minors demonstrated very low levels of knowledge about tobacco products and health threats associated with tobacco

products may influence their smoking behaviors [12]. Rephrase this sentence. “Past studies indicated that very low levels of knowledge of tobacco products and health threats associated with tobacco products may influence smoking behaviors [12]”. 125-127... This study, together with the international body evidence, suggests that smoke-free multimedia pamphlets and advertisements are effective in tobacco hazard prevention...Rephrase this sentence...This study has substantiated results from past studies on the effectiveness of the use of smoke-free multimedia pamphlets and advertisements in prevention of hazards associated with tobacco usage by humans.
