

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_27370
Title of the Manuscript:	Phytochemical and Anti-microbial study of Seventy Percent Methanol leaf Extract of Terminalia microptera against some Selected Pathogenic bacteria.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript is easy to read and understand. It is clear, but it's necessary Minor Revision, for an example, it's necessary explain more details in the Materials and Methods. The Discussion is very poor. It's necessary to complete information what software was used and information about its such as frequencies (i.e: Statistic 7.0 (Company name, city, country)). I think the statement may be submitted to phytochemical screening Preliminary by other methodologies for detection of the major classes of secondary metabolites through chemical reactions resulting in color development and / or precipitate, characteristic for each class of substances according to Matos, 1997 (Matos FJ. Introduction to experimental phytochemical. 2.ed. Fortaleza: UFC Issues; 1997. 141p.).	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
